Billing

Search, discount, print, and save counter sales fast.

Storefront

Customer browsing, cart, OTP login, and order flow.

What the app covers

Designed to replace scattered tools and bring retail operations into one manageable system.

Fast POS billing

Billing with stock checks, customer autofill, discounts, and print support.

Customer management

Mobile-first records, purchase history, and reuse across billing flows.

Coupons and offers

Backend-driven pricing, one active coupon logic, and auto recalculation.

Salesperson tracking

Assign sales, track staff performance, and control visibility by role.

Inventory management

Product editing, search, low-stock alerts, and stock-aware selling.

Website storefront

Cart, checkout, OTP login, account history, and customer ordering.

Marketing workflows

WhatsApp, Instagram, Facebook campaign support, and visit tracking.

Reports and analytics

Daily, monthly, annual, category-wise, and item-wise reporting.

Who this is for

Best for retail businesses that want both operational speed and a professional online selling presence.

Best fit

- Boutiques and fashion stores
- Beauty and cosmetics retailers
- Gift and lifestyle stores
- Specialty retail businesses

Why it sells

- Combines offline billing and online sales
- Reduces manual work across teams
- Supports better pricing and promotions
- Gives owners clear visibility into business performance

Delivery options and commercial model

Commercials are shared after requirement mapping. Final scope depends on modules, integrations, rollout, and support expectations.

DELIVERY OPTION	TYPICAL SCOPE	COMMERCIAL APPROACH
Starter rollout For shops starting online presence	Branded website, product catalogue, mobile browsing, basic order collection, and admin product control	Quoted after scope mapping Best for first-stage digital adoption
Growth rollout For active online selling	Customer login, cart, checkout, coupons, reports, and website order management	Shared after requirement review Useful for businesses scaling online sales
Integrated rollout For integrated retail operations	Inventory sync, marketing tools, analytics, salesperson tracking, and advanced reporting	Planned per final scope Designed for broader operational control

Commercial note: Web hosting, storage, domain, SMS/WhatsApp usage, payment gateway fees, and other third-party cloud services are charged separately in the client's own account.
