

Retail Commerce App

BILLING, INVENTORY, ECOMMERCE, AND GROWTH SYSTEM

BUILT FOR MODERN RETAIL BUSINESSES

One app to run your counter, customers, inventory, and online sales.

A complete retail operating system for shops that want fast billing, stock control, offers, customer management, website orders, reports, and marketing from one dashboard.

COUNTER SALES

Fast billing, stock checks, customer autofill, discounts, and print-ready invoices.

ONLINE SELLING

Customer website, cart, checkout, offers, OTP login, and order management.

BUSINESS CONTROL

Inventory, reports, salesperson tracking, role-based access, and pricing rules.

GROWTH TOOLS

Campaigns, coupons, visitor tracking, and marketing insights in one admin panel.

PREMIUM BROCHURE

Retail Storefront

CUSTOMER SITE

ONLINE SELLING EXPERIENCE

Browse, add to cart, log in, and order online.

Operations Snapshot

REALTIME

Demo-ready, client-ready, retail-ready.

A complete brochure for presenting the app to retail businesses that want billing, inventory, website orders, and operational control in one system.

What shoppers get

A polished customer website experience that helps the business actually sell, not just display products.

Branded online storefront

OTP customer login

What the business gets

One operational system for counter billing, inventory, website orders, reports, customers, and promotions.

Mobile-friendly browsing with category-led discovery.

Simple sign-in flow with order history and account access.

Cart and checkout

Website orders with address handling and payment flow support.

Real product availability

Customer-friendly stock messaging and availability visibility.

Coupons and offers

Automatic pricing rules with single active coupon logic.

Trending products

Best-selling products ranked from actual sales activity.

Fast POS billing

Counter-ready billing with customer search, stock checks, and print flow.

Customer database

Mobile-first customer records and purchase history reuse.

Reports and analytics

Daily, monthly, annual, product-wise, and salesperson-wise reporting.

Inventory management

Product editing, low-stock alerts, search, and stock-aware selling.

Salesperson tracking

Assign sales to staff, view role-based dashboards, and measure performance.

Marketing tools

Campaign workflows for WhatsApp, Instagram, and Facebook.

Why clients buy this

- Runs offline billing and online orders from one admin system.
- Reduces manual work across inventory, offers, and customer handling.
- Creates a professional selling experience for both counter and website customers.
- Gives owners clear reporting, staff visibility, and operational control.
- Works especially well for boutiques, beauty stores, lifestyle retail, gift shops, and specialty retail.

DELIVERY OPTION	WHAT IT COVERS	COMMERCIAL NOTE
Starter rollout For shops beginning digital operations	Branded website, product catalog, mobile browsing, product management, and guided launch support	Quoted after scope mapping Final commercials depend on modules and rollout depth
Growth rollout For active online selling	Customer login, cart, checkout, coupons, website order management, reports, and custom domain setup	Shared after requirement review Best for businesses adding stronger ecommerce workflows
Integrated rollout For full retail operations control	Inventory sync, marketing tools, analytics, salesperson tracking, and advanced operational reporting	Planned per final scope Recommended for multi-role teams and growth-focused stores

Commercial note: Final commercials are shared after requirement mapping and rollout planning. Cloud hosting, storage, domain, SMS/WhatsApp usage, and third-party payment costs are billed separately in the client's own account.
