

Retail Commerce App

TRIFOLD SALES BROCHURE

RETAIL OPERATIONS IN ONE SYSTEM

Sell faster, manage better, and grow online.

A retail software platform that combines billing, inventory, customer management, online selling, reports, and team visibility in one connected app.

BILLING + POS

Fast billing with stock checks, discounts, customer search, and print support.

INVENTORY + PRICING

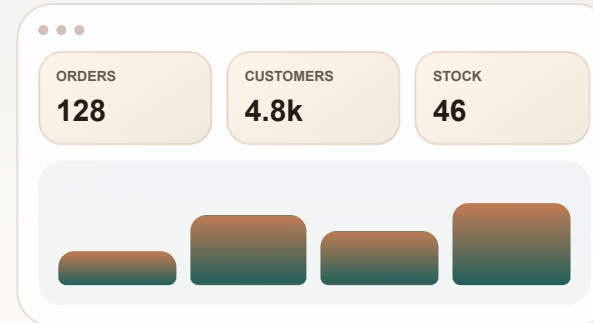

Product editing, low-stock alerts, shop price and website price control.

WEBSITE + ORDERS

Storefront, cart, OTP login, checkout, offers, and order history.

What the app covers

For shops that want both operational speed and a proper online selling system.

Customer website

Branded storefront, mobile-first browsing, cart, checkout, and account access.

Coupons and offers

Single active coupon logic, pricing recalculation, and promotion control.

Salesperson tracking

Assign sales, measure staff performance, and control visibility by role.

Reports and analytics

Daily, monthly, annual, category-wise, item-wise, and salesperson-wise reporting.

Marketing tools

Campaign workflows with WhatsApp, Instagram, Facebook, and visit tracking.

Delivery options

Commercials are shared after requirement mapping and rollout planning.

Starter rollout

Branded website, product catalogue, product management, and guided launch support.

Scope-based commercial

Shared after requirement review

Growth rollout

Customer login, cart, checkout, coupons, reports, and website order management.

Custom proposal

Positioned after scope finalization

Integrated rollout

Inventory sync, marketing tools, analytics, salesperson tracking, and advanced reporting.

Final commercial scope

Recommended for full operational control

Commercial note: Hosting, storage, domain, SMS/WhatsApp usage, payment gateway fees, and other third-party cloud services are billed separately in the client's own account.
